

Smart, simple safety software

*The safety management software
endorsed by Clear Logic Solutions*

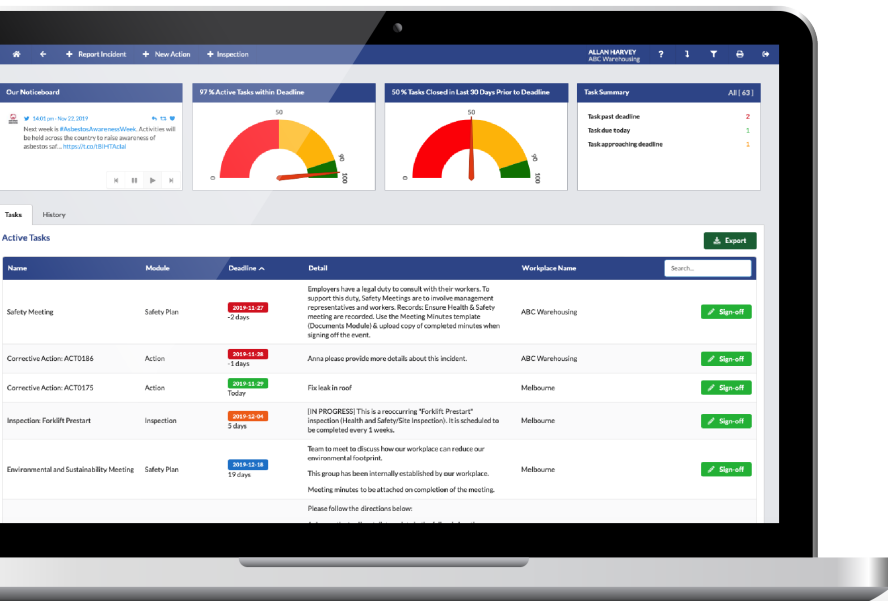

Safety Champion makes your safety program hum

Plan your health and safety program, capture safety related activity, monitor your progress, and improve your performance over time.

With Safety Champion you now know exactly what's going on with safety at any given time with real-time data, powerful reporting, and an easy-overview dashboard snapshot.

Now you know you are keeping your people safer than ever. With Safety Champion, it's all under control.

Reach out to us today to discuss how Safety Champion Software can meet your OHS needs.

- Full configurability
- Built-in templates
- Email reminders
- Reporting & analytics
- iOS & Android apps
- Cloud-based storage

Modules

INCIDENT

Make incident reporting and investigation a simpler process with an easy online reporting form and auto-generated email notifications landing directly in key stakeholder inboxes.

SAFETY PLAN

Establish and allocate recurring safety and compliance tasks to individual workplaces, then monitor their progress from the easy-overview dashboard.

INSPECTIONS

Create customised workplace inspections, checklists and audits, then schedule these to ensure that they are completed within identified timeframes.

ACTION / HAZARD

Input, track and monitor all hazards, corrective actions, and workplace improvements until close-off, complete with reminders to keep things moving.

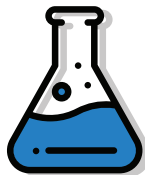

HR

Store worker emergency contact details, training records, worker's compensation documents, and performance management information all in one place.

DOCUMENTS

Gain access to AltiusWHS's configurable health and safety manual and other templates, and/or manage versions of your own internal policies and procedures.

CHEMICALS

Allocate chemical Safety Data Sheets to individual workplaces, so that important chemical related hazard information can be shared with your people for improved safety.

TRAINING

Upload relevant training documentation and certifications, and keep track of upcoming expiry dates so you know your people are properly trained and ready for work.

INSURANCE

Manage all internal and contractor insurances, registrations, licences and certificates, and be reminded as their expiry dates approach.

REPORTING

Monitor how your safety program is progressing with real-time reporting, both on-screen and downloadable!

CONTRACTOR

Utilise the functionality of our records management modules to easily oversee contractor documentation from one simple location.

COMMUNICATION / INDUCTION

Create and share important safety communications, like inductions, with workers, contractors, and others, and get confirmation of receipt.
